

# Match Status (ECB Mobile)

## [Play-Cricket Scorer FAQ](#)

To update the status of the match, tap on the menu icon at the top right corner of [Scoresheet](#) and select "Match Status".

### Highlighted Features:

- (1) To return to Scoresheet, tap on Cancel. To save changes made, tap on Done.
- (2) To put the match in Break mode, select the type of break from options such as: drinks, lunch, tea, stumps, rain delay.

#### Note

Putting a match in Break mode disables the scoring buttons on the Scoresheet. The scoring panel is replaced with the reason for the pause (for example "Match Paused for lunch"), and an option to end the break and resume scoring.

- (3) To select whether or not to use the [DL Calculator](#), use the toggle switch for Use Duckworth-Lewis.
- (4) To access the Duckworth-Lewis [Calculator](#) for resetting target in an interrupted one-day match, tap on DL Calculator.
- (5) To split the current batting innings, and change the batting team, turn the split innings switch to ON and tap Done.
- (6) To select whether or not to bring an inning to a close, use the toggle switch for Close innings.
- (7) When the Close Innings switch is ON, choose type of close from options such as: All out, Compulsory close, Declared.
- (8) To select whether or not to bring the match to a close, use the toggle switch for End match. When the End Match switch is ON, tap on Done to get the [Match Result](#) screen.

 **Note**

If the app is not connected to the internet, ending a match shows the match in the 'In Progress' section on the [Matches](#) screen.

Once connected to the internet, ending a match (after the completion of [Match Result](#)) syncs the match scores to the Play-Cricket server and shows the match in the 'Completed Matches' section on the Matches screen.
