

Replace team in Draw

After a draw/schedule has been created, it may be necessary to replace a team for the remaining matches for the season.

This is required sometimes:

- as part of a team re-grading or a team pulling out.
- to accommodate competitions that want to publish a schedule before all teams are known where "placeholder" teams were used.

This procedure will replace teams only where match results have yet to be entered (for those matches that do have results please see the [Team Re-grading](#) screen).

1. The replacement teams will need to be added to the required grade so duplicate team names can be adjusted if need be. See [Allocate Teams To Grade](#).
2. Edit the [Team Settings](#) for the new team where required.
3. In the [Replace Team in Draw](#) screen, select the desired **Season** and **Grade** for the team to be replaced. A list of all teams allocated to that season and grade will appear.
4. In the **Replace with Team** dropdown menu next to the team to be replaced, select the replacement team.
5. If you want the draw/schedule to reflect the default home venue and start time for the replacement team, check the **Update Home Setting** check box, otherwise the venue and start time will be unchanged.

6. Click **Update** and **OK** to save changes.
